Contents of Volume 45

Number 1, October 1, 1971

ANTHONY J. PLAYTIS AND NELSON J. LEONARD. The Synthesis of Ribosyl- <i>cis</i> -Zeatin And Thin Layer Chromatographic Separation of the <i>cis</i> and <i>trans</i> Isomers of Ribosylzeatin	1
R. PENNIAL AND H. I. ZEYA. The Effects of Cationic Proteins of Rabbit Polymorphonuclear Leukocyte Lysosomes on the Respiratory Activity of Liver Mitochondria	6
RICHARD ASCIONE AND GEORGE F. VANDE WOUDE. Ribosomal Factors Effecting the Stimulation of Cell-Free Protein Synthesis in the Presence of Foot-and-Mouth Disease Virus Ribonucleic Acid. .	14
TED R. LINDSTROM, JOHN S. OLSON, NANCY H. MOCK, QUENTIN H. GIBSON, AND CHIEN HO. Nuclear Magnetic Resonance Studies of Hemoglobins. VIII. Evidence for Preferential Ligand Binding to β Chains Within Deoxyhemoglobins	22
HIROSHI AKANUMA, AKIHARU KASUGA, TSUYOSHI AKANUMA, AND MAKOTO YAMASAKI. The Effective Use Of Affinity Chromatography for the Study of Complex Formation of Bovine Carboxypeptidase B with Basic and Aromatic Acid Analogues	27
Y. LIN AND R. D. KOBES. Affinity Labeling of Yeast Aldolase By Haloacetol Phosphates.	34
JOSEPH EICHBERG, GEORGE HAUSER, AND HARVEY M. SHEIN. Polyphosphoinositides in Normal and Neoplastic Rodent Astrocytes	43
L. SHLATZ AND G. V. MARINETTI. Protein Kinase Mediated Phosphorylation of the Rat Liver Plasma Membrane	51
RONALD R. WAGNER AND MORRIS A. CYNKIN. Glycoprotein Metabolism: A UDP-Galactose: Glycoprotein Galactosyltransferase of Rat Serum	57
F. M. SIROTNAK. Marked Enhancement of <i>Diplococcus pneumoniae</i> Competence for Transformation by Tryptic Peptides of Casein	63
N. KATUNUMA, E. KOMINAMI, AND S. KOMINAMI. A New Enzyme That Specifically Inactivates APO-Protein of Pyridoxal Enzymes	70
N. KATUNUMA, K. KITO, AND E. KOMINAMI. A New Enzyme that Specifically Inactivates APO-Protein of NAD-Dependent Dehydrogenases	76
M. G. GUERRERO, J. RIVAS, A. PANEQUE, AND M. LOSADA. Mechanism of Nitrate and Nitrite Reduction in <i>Chlorella</i> Cells Grown in the Dark	82
EDWARD D. KORN AND THOMAS OLIVECRONA. Composition of an Amoeba Plasma Membrane.	90
TA-HSU CHOU AND MARY E. KIRTLEY. p-Nitrophenyl Phosphate as Substrate for Rabbit Liver Fructose Diphosphatase	98
A. GÓMEZ-PUYOU, F. SANDOVAL, M. TUENA DE GÓMEZ-PUYOU, A. PEÑA, AND E. CHÁVEZ. Dependency of the 2,4-Dinitrophenol Stimulated ATPase Activity on K^+ and Respiration	104
WALTER G. ZUMFT AND HART SPILLER. Characterization of a Flavodoxin from the Green Alga <i>Chlorella</i>	112
C. GEORGE-NASCIMENTO, R. PONT-LEZICA, AND O. CORI. Non Enzymic Formation of Nerolidol from Farnesyl Pyrophosphate in the Presence of Bivalent Cations	119
R. E. PALMER AND R. L. ANDERSON. Cellobiose Metabolism: A Pathway Involving Adenosine 5'-Triphosphate-Dependent Cleavage of the Disaccharide	125
WAYNE C. LABELLE, DAVID S. MILLER, AND JOSEPH LERNER. Interactions between Leucine and Arginine Transport in Chicken Small Intestine	131
MALCOLM HIGGINS, TAKASHI KAWACHI, AND HARRY RUDNEY. The Mechanism of the Diurnal Variation of Hepatic HMG-CoA Reductase Activity in the Rat	138
SHINICHIRO ARASHIMA AND ICHIRO MATSUDA. Ornithine Transcarbamylase, an Isoelectric Point(pI) Isozyme in Human Liver and its Deficiency	145
C.-Y. LIAN, S. ROTH, AND D. R. HARKNESS. The Effect of Alteration of Intracellular 2,3-DPG Concentration upon Oxygen Binding of Intact Erythrocytes Containing Normal and Mutant Hemoglobins	151
VIKTOR STOLC. Stimulation of Iodoproteins and Thyroxine Formation in Human Leukocytes by Phagocytosis	159
R. A. LONG, F. E. HRUSKA, AND H. D. GESSER. Phase Transitions in Sphingomyelin Thin Films. A Spin Label Study	167
R. A. BADLEY, H. SCHNEIDER, AND W. G. MARTIN. Orientation and Motion of a Fluorescent Probe in Model Membranes	174
ARTHUR F. WAGNER, R. L. BUGIANESI, AND T. Y. SHEN. Preparation of Sepharose-Bound Poly(rI:rC)	184

M. ABOUD AND M. BURGER. Adenosine Triphosphate and Catabolite Repression of β -Galactosidase in <i>Escherichia coli</i>	190
G. L. NELSESTUEN AND J. W. SUTTIE. Properties of Asialo and Aglycoprothrombin	198
R. LÖSER, P. L. BOQUET, AND R. RÖSCHENTHALER. Inhibition of R-Factor Transfer by Levallorphan ..	204
RICHARD A. DiCICCIO AND NORMAN STRAUSS. Annealing Studies of Transcription in <i>B. subtilis</i>	212
T. SUKENO, A. L. TARENTINO, T. H. PLUMMER, JR., AND F. MALEY. On the Nature of α -Mannosidase-Resistant Linkages in Glycoproteins	219
NICHOLAS A. KEFALIDES. Isolation of a Collagen from Basement Membranes Containing Three Identical α -Chains	226
DANIEL F. VEBER, CARL D. BENNETT, JOHN D. MILKOWSKI, GEORGE GAL, ROBERT G. DENKEWALTER, AND RALPH HIRSCHMANN. Synthesis of a Proposed Growth Hormone Releasing Factor	235
G. HOLME, SUSAN L. BOYD, AND A. H. SEHON. Precipitation of Polyribosomes with Pepsin Digested Antibodies	240
F. MICHAEL SCHULTZ, MARY BOB WYLIE, AND JOHN M. JOHNSTON. The Relationship between the Monoglyceride and Glycerol-3-Phosphate Pathways in Adipose Tissue	246
TADASHI KUROKAWA, KYOZO OGURA, AND SHUICHI SETO. Formation of Polyprenyl Phosphates by a Cell-Free Enzyme of <i>Micrococcus lysodeikticus</i>	251
DAVID WILLIAMS AND JACK GORSKI. A New Assessment of Subcellular Distribution of Bound Estrogen in the Uterus	258
KENNETH R. CUTRONEO AND EDWARD BRESNICK. 2-Mercapto-1-(β -4-Pyridethyl) Benzimidazole, an Inhibitor of RNA Synthesis: A Reevaluation	265
Errata	270

Number 2, October 15, 1971

S. BOSE AND F. FRIEDBERG. Sequence of Dodecapeptide Containing Active Lysine From Chicken ATP: Creatine Phosphotransferase	27
G. E. EDWARDS, R. KANAI, AND C. C. BLACK. Phosphoenolpyruvate Carboxykinase In Leaves of Certain Plants Which Fix CO ₂ By The C ₄ -Dicarboxylic Acid Cycle of Photosynthesis	278
H. R. BESCH, JR. AND A. SCHWARTZ. Initial Calcium Binding Rates of Canine Cardiac Relaxing System (Sarcoplasmic Reticulum Fragments) Determined by Stopped-Flow Spectrophotometry	286
C. D. HUBBARD AND T. P. STEIN. The Pepsin Catalysed Hydrolysis of Bis-P-Nitrophenyl Sulfite	293
KELVIN K. OGILVIE, LEWIS SLOTIN, AND PAT RHEAULT. Novel Substrate of Adenosine Deaminase	297
BRIGID L. M. HOGAN. Effect of Growth Conditions on the Ornithine Decarboxylase Activity of Rat Hepatoma Cells	30
PIET A. LECLERCQ AND DOMINIC M. DESIDERIO. Permethylation of Methionine-Containing Oligopeptides for Sequence Analysis by Mass Spectrometry	308
WILLIAM C. SUMMERS AND KAREN JAKES. Phage T7 Lysozyme mRNA Transcription and Translation <i>in vivo</i> and <i>in vitro</i>	311
Y. GRAZIANI AND A. LIVNE. Vasopressin and Water Permeability of Artificial Lipid Membranes	32
M. A. CUSANOVICH AND D. E. EDMONDSON. The Isolation and Characterization of <i>Rhodospirillum rubrum</i> Flavodoxin	32
RICHARD A. ALDEN, JENS J. BIRKTOFT, JOSEPH KRAUT, JON D. ROBERTUS, AND CHRISTINE S. WRIGHT. Atomic Coordinates for Subtilisin BPN' (or Novo)	33
D. NIETHAMMER AND F. M. HUENNEKENS. Bound TPN as the Determinant of Polymorphism in Methemoglobin Reductase	34
W. G. BRIDGERS, R. D. CUNNINGHAM, AND G. GRESSETT. Properties Distinguishing Mitochondrial and Synaptosomal Protein Synthesis	35
M. LEV AND A. F. MILFORD. Vitamin K Stimulation of Sphingolipid Synthesis	35

AUTHOR INDEX	1631

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

In order to assure rapid and accurate publication, it is essential that manuscripts be prepared according to the instructions given below. Manuscripts which do not conform to these specifications may have to be returned for retyping.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8½ x 11" high quality paper (the complete manuscript, including space occupied by figures and tables, should be not more than 8 pages long).

Summary: The article must be preceded by a brief summary, typed single-spaced, not to exceed 10 lines in length (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Since articles are reproduced directly from manuscripts, the latter must be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used, and special care should be taken to insure a sharp, clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division, and punctuation.

Manuscripts should be double-spaced, on only one side of the sheet; **references, footnotes, and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6½" wide by 9½" long.

Use of Symbols and Abbreviations. Abbreviations except for those in the Commission on Biochemical Nomenclature Document #1 (*Arch. Biochem. Biophys.* **115**, 1-12 (1966)) must be defined, and ambiguous abbreviations such as TCA, or P to signify anything but phosphate, should be avoided. Authors are urged to use chemical formulas, such as CCl_3COOH , wherever possible. If improper abbreviations are used it may be necessary to return manuscripts for retyping, which will delay their publication.

Footnotes should be typed single-spaced, at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. Photographs are acceptable. Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink. Illustrations and tables should be submitted on separate sheets. **Do not attempt to insert the figures, figure legends, or tables into the text.** This will be done by the Publishers.

All drawings should be done in black ink on white paper or tracing cloth; they must be planned for reduction to a width of not more than 5". Final size of the printed page is 5½ x 8¾"; figures must be planned to fit these proportions.

Graph paper, if used, should be ruled in blue; grid lines that are to show in the final reproduction should be inked in black. High quality glossy prints are acceptable.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature may be cited by number and listed in numerical order in a single-spaced list placed at the end of the manuscript. Abbreviations of journal titles should be those used in *Chemical Abstracts*.

Mailing. To avoid creasing, please place manuscripts between cardboards when mailing.

Reprints

Reprint order forms are sent to the authors immediately upon acceptance of their manuscripts. The price list is included.
